This version of GitHub Enterprise was discontinued on 2023-03-15. No patch releases will be made, even for critical security issues. For better performance, improved security, and new features, upgrade to the latest version of GitHub Enterprise. For help with the upgrade, contact GitHub Enterprise support.

Creating actions

You can create your own actions, use and customize actions shared by the GitHub community, or write and share the actions you build.

> **Note:** GitHub-hosted runners are not currently supported on GitHub Enterprise Server. You can see more information about planned future support on the GitHub public roadmap.

About custom actions

Creating a Docker container action

Creating a JavaScript action

Creating a composite action

Metadata syntax for GitHub Actions

Dockerfile support for GitHub Actions

Setting exit codes for actions

Releasing and maintaining actions
