About removal of enterprise members

Removing a member from your enterprise

You can remove an enterprise member from an enterprise.

> **Who can use this feature**
> Enterprise owners can remove an enterprise member from an enterprise.

About removal of enterprise members 🔗

If your enterprise does not use Enterprise Managed Users, you can remove an enterprise member from GitHub. When you remove a member from your enterprise, the member is removed from all organizations owned by your enterprise. Removing a member from your enterprise also removes any of the member's administrative roles, such as the owner or billing manager roles. For more information, see "Roles in an enterprise."

If the enterprise member you're removing is the last owner of an organization owned by your enterprise, you will become an owner of that organization.

If your enterprise or any of the organizations owned by your enterprise uses an identity provider (IdP) to manage organization membership, the member may be added back to the organization by the IdP. Make sure to also make any necessary changes in your IdP.

If your enterprise does use Enterprise Managed Users, you must remove the enterprise members through your identity provider (IdP) and the SCIM integration instead. For more information, see "About Enterprise Managed Users."

Removing a member from your enterprise 🔗

> **Note:** If an enterprise member uses only GitHub Enterprise Server, and not GitHub Enterprise Cloud, you cannot remove the enterprise member this way.

1. In the top-right corner of GitHub.com, click your profile photo, then click **Your enterprises**.

2. In the list of enterprises, click the enterprise you want to view.

3. In the enterprise account sidebar, click 🚹 **People**.

4. To the right of the person you want to remove, select the ⋯ dropdown menu and click **Remove from enterprise**.
