> **This version of GitHub Enterprise was discontinued on 2023-03-15.** No patch releases will be made, even for critical security issues. For better performance, improved security, and new features, upgrade to the latest version of GitHub Enterprise. For help with the upgrade, contact GitHub Enterprise support.

Managing contribution settings on your profile

Your contributions, including commits, proposed pull requests, and opened issues, are displayed on your profile so people can easily see the work you've done.

Viewing contributions on your profile

Your GitHub Enterprise Server profile shows off your pinned repositories, Achievements, and a graph of your repository contributions over the past year.

Showing an overview of your activity on your profile

You can enable the activity overview section on your profile to give viewers more context about the types of contributions you make.

Showing your private contributions and achievements on your profile

Your GitHub Enterprise Server profile shows a graph of your repository contributions over the past year. You can choose to show anonymized activity from private and internal repositories in addition to the activity from public repositories.

Sending enterprise contributions to your GitHub.com profile

You can highlight your work on GitHub Enterprise by sending the contribution counts to your GitHub.com profile.

Why are my contributions not showing up on my profile?

Learn common reasons that contributions may be missing from your contributions graph.

Troubleshooting commits on your timeline

You can view details for commits from your profile's timeline. If you don't see commits you expect on your profile or can't find commit details from your profile page, the commit date and the commit author date may be different.
