Security best practices for apps on GitHub Marketplace

Guidelines for preparing a secure app to share on GitHub Marketplace.

> **Note:** This article applies to publishing GitHub Apps in GitHub Marketplace only. For more information about publishing GitHub Actions in GitHub Marketplace, see "[Publishing actions in GitHub Marketplace](#)."

Before listing an app on GitHub Marketplace, you should follow the best practices for the type of app that you are listing:

- "[Best practices for creating a GitHub App](#)"
- "[Best practices for creating an OAuth app](#)"

Additionally, you should have the capability to notify GitHub within 24 hours of a confirmed security incident.

In addition to following security best practices, you should also follow customer experience best practices. For more information, see "[Customer experience best practices for apps](#)."
