Upgrading to the GitHub Customer Agreement

Organizations can upgrade from the Standard Terms of Service to the GitHub Customer Agreement.

The Standard Terms of Service is an agreement between GitHub and you as an individual. To enter into an agreement with GitHub on behalf of an entity, such as a company, non-profit, or group, organization owners can upgrade to the GitHub Customer Agreement.

You can upgrade to the GitHub Customer Agreement instead of using the Standard Terms of Service to help prevent sensitive information from being exposed. For more information see "Best practices for preventing data leaks in your organization."

1. Navigate to your organization's settings and scroll to the **Terms of Service** section.

2. Click **Read the GitHub Customer Agreement**.

3. After you've read the GitHub Customer Agreement, click **Sign GitHub customer terms**.

4. Select **Yes, I want to sign these terms on behalf of my business.**

5. In the text field, type the name of the company, non-profit, or group that owns the organization account. This is the entity that will enter into an agreement with GitHub.

6. To agree to the GitHub Customer Agreement on behalf of your entity, click **Accept terms**.
