Archiving cards on a classic project

Restoring cards on a classic project from the sidebar

You can archive classic project cards to declutter your workflow without losing the historical context of a project.
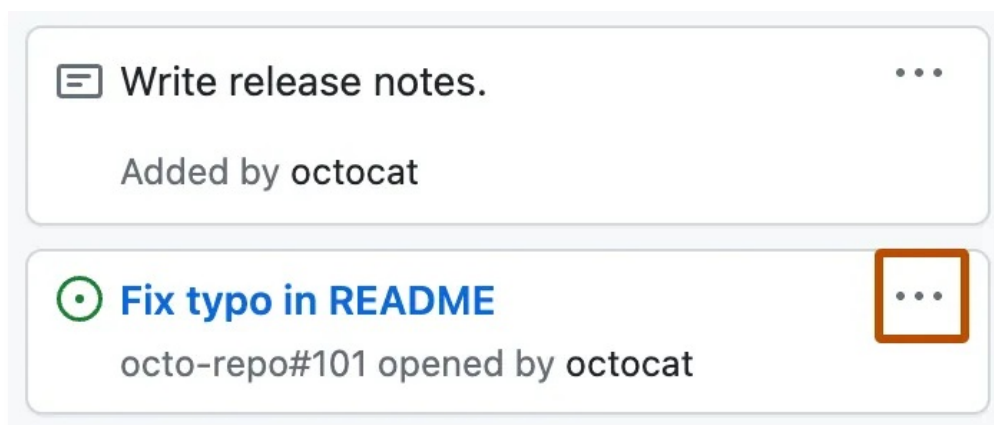

> **Notes:**
> - Projects, the all-new projects experience, is now available. For more information about Projects, see "About Projects."
> - You can only create a new classic project board for an organization, repository, or user that already has at least one classic project board. If you're unable to create a classic project board, create a project instead.

Automation in your classic project does not apply to archived classic project cards. For example, if you close an issue in a classic project's archive, the archived card does not automatically move to the "Done" column. When you restore a card from the classic project archive, the card will return to the column where it was archived.

Archiving cards on a classic project 🔗

1. In a classic project, find the card you want to archive, then click ⋯.

2. Click **Archive**.

Restoring cards on a classic project from the sidebar 🔗

1. On the top-right side of the classic project, click ☰ **Menu**.

2 Click ···, then click **View archive**.

3 Above the classic project card you want to unarchive, click **Restore**.
