# Viewing whether users in your organization have 2FA enabled

You can see which organization owners, members, and outside collaborators have enabled two-factor authentication.

> **Note:** You can require that all members and outside collaborators in your organization have two-factor authentication enabled. For more information, see "Requiring two-factor authentication in your organization."

1. In the top right corner of GitHub Enterprise Server, click your profile photo, then click **Your organizations**.

2. Click the name of your organization.

3. Under your organization name, click ⚇ **People**.

4. To view organization members, including organization owners, who have enabled or disabled two-factor authentication, on the right, select **2FA**, then click **Enabled** or

Disabled.

5. To view outside collaborators in your organization, in the "Organization permissions" sidebar, click **Outside collaborators**.

6. To view which outside collaborators have enabled or disabled two-factor authentication, above the list of outside collaborators, select the **2FA** dropdown menu, then click **Enabled** or **Disabled**.
