About badges

Creating a custom badge

You can replace the default badge on your GitHub App by uploading your own logo image and customizing the background.

About badges 🔗

Every GitHub App has a badge. A badge is a square image inside a circular background.

By default, a new GitHub App will use an automatically generated identicon as a badge. An identicon badge looks something like this:

After you register a GitHub App, you can customize your app's badge by uploading a logo and selecting a background color. Your logo should be a PNG, JPG, or GIF file under 1 MB in size. For the best quality rendering, we recommend an image dimension of 200 pixels by 200 pixels.

Creating a custom badge 🔗

1. In the upper-right corner of any page on GitHub, click your profile photo.

2. Navigate to your account settings.
   - For a GitHub App owned by a personal account, click **Settings**.
   - For a GitHub App owned by an organization:

     a. Click **Your organizations**.

     b. To the right of the organization, click **Settings**.

3. In the left sidebar, click ‹› **Developer settings**.

4. In the left sidebar, click **GitHub Apps**.

5. To the right of the GitHub App you want to modify, click **Edit**.

6. Under "Display information", drag and drop an image from a local folder or click **Upload a logo** to select an image from your computer.

7. Optionally, crop your image.

8. Click **Set new avatar**.

9. Under "Badge background color", type the hexadecimal color code of the background color for your badge.
