# Integrating Jira with your organization project board

You can integrate Jira Cloud with your organization account to scan commits and pull requests, creating relevant metadata and hyperlinks in any mentioned Jira issues.

**1** In the top right corner of GitHub Enterprise Server, click your profile photo, then click **Your organizations**.

**2** Next to the organization, click **Settings**.

**3** In the left sidebar, select ‹› **Developer settings**, then click **OAuth Apps**.

**4** Click **New OAuth App**.

**5** Under **Application name**, type "Jira".

**6** Under **Homepage URL**, type the full URL to your Jira instance.

**7** Under **Authorization callback URL**, type the full URL to your Jira instance.

**8** Click **Register application**.

**9** Under **Organization owned applications**, note the "Client ID" and "Client Secret" values.

10. Link your GitHub account with Jira. For more information, see [Atlassian's help documentation](#).
