This version of GitHub Enterprise was discontinued on 2023-03-15. No patch releases will be made, even for critical security issues. For better performance, improved security, and new features, upgrade to the latest version of GitHub Enterprise. For help with the upgrade, contact GitHub Enterprise support.

Deployment

Automatically deploy projects with GitHub Actions.

About deployments

    About continuous deployment

    Deploying with GitHub Actions

Deploying to your cloud provider

    Deploying to Amazon Elastic Container Service

    Deploying to Azure

    Deploying to Google Kubernetes Engine

Targeting different environments

    Using environments for deployment

Managing your deployments

    Viewing deployment history

Deploying Xcode applications

    Installing an Apple certificate on macOS runners for Xcode development
