Deleting a GitHub Pages site

In this article

You can delete a GitHub Pages site.

> **Who can use this feature**
> People with admin or maintainer permissions for a repository can delete a GitHub Pages site.

> GitHub Pages is available in public repositories with GitHub Free and GitHub Free for organizations, and in public and private repositories with GitHub Pro, GitHub Team, GitHub Enterprise Cloud, and GitHub Enterprise Server.
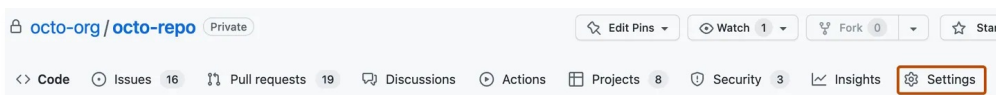

Deleting your site 🔗

You can delete your site in two ways:

- Delete the repository. For more information, see "Deleting a repository."
- Change the source to the `None` branch. For more information, see Deleting your site by changing the source below.

If you want to remove the current deployment of your site but do not want to delete the site, you can unpublish your site. For more information, see "Unpublishing a GitHub Pages site."

Deleting your site by changing the source 🔗

1 On GitHub Enterprise Server, navigate to your site's repository.

2 Under your repository name, click ⚙ **Settings**. If you cannot see the "Settings" tab, select the ••• dropdown menu, then click **Settings**.

3 In the "Code and automation" section of the sidebar, click ▭ **Pages**.

4 Under "Build and deployment", under "Source", select **Deploy from a branch** even if the site is currently using GitHub Actions.

5 Under "Build and deployment", use the branch dropdown menu and select `None` as the publishing source.

Branch

Your GitHub Pages site is currently being built from the `main` branch. [Learn more](#).

None ▾   Save

6 Click **Save**.
