# Viewing whether users in your organization have 2FA enabled
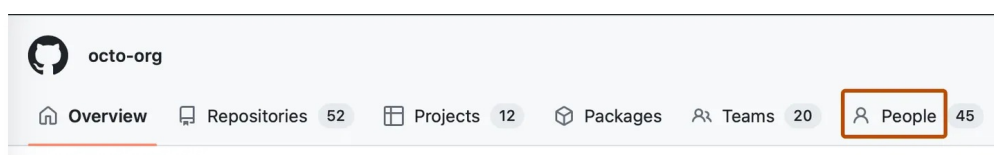

You can see which organization owners, members, and outside collaborators have enabled two-factor authentication or are required to do so.

> **Note:** You can require that all members, including, owners, billing managers and outside collaborators in your organization have two-factor authentication enabled. For more information, see "Requiring two-factor authentication in your organization."

1. In the top right corner of GitHub.com, click your profile photo, then click 🏢 **Your organizations**.

2. Click the name of your organization.

3. Under your organization name, click 👤 **People**.

4. To view organization members, including organization owners, who have enabled or
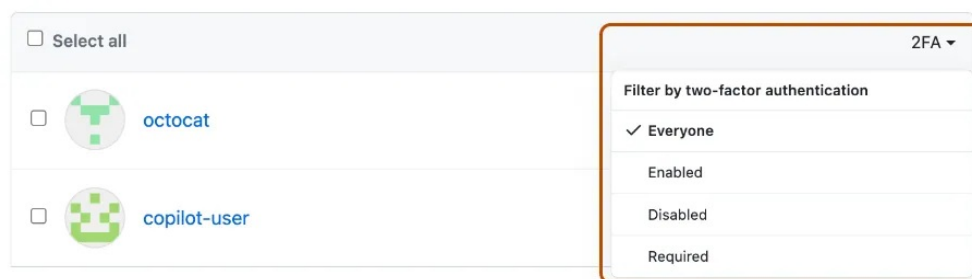

disabled two-factor authentication, on the right, select **2FA**, then click **Enabled** or **Disabled**. Additionally, you can view which members are required to enable two-factor authentication by clicking **Required**.

> **Note:** Starting in March 2023 and through the end of 2023, GitHub will gradually begin to require all users who contribute code on GitHub.com to enable one or more forms of two-factor authentication (2FA). If you are in an eligible group, you will receive a notification email when that group is selected for enrollment, marking the beginning of a 45-day 2FA enrollment period, and you will see banners asking you to enroll in 2FA on GitHub.com. If you don't receive a notification, then you are not part of a group required to enable 2FA, though we strongly recommend it.
>
> For more information about the 2FA enrollment rollout, see [this blog post](#).

5. To view outside collaborators in your organization, in the "Organization permissions" sidebar, click **Outside collaborators**.

6. To view which outside collaborators have enabled or disabled two-factor authentication, above the list of outside collaborators, select the **2FA** dropdown menu, then click **Enabled** or **Disabled**. Additionally, you can view which members are required to enable two-factor authentication by clicking **Required**.
