Securing your account with two-factor authentication (2FA)

You can set up your account on your GitHub Enterprise Server instance to require an authentication code in addition to your password when you sign in.

About two-factor authentication

Configuring two-factor authentication

Configuring two-factor authentication recovery methods

Accessing GitHub using two-factor authentication

Recovering your account if you lose your 2FA credentials

Changing your preferred two-factor authentication method

Disabling two-factor authentication for your personal account
