Managing code scanning alerts

Learn how to triage, track, and resolve code scanning alerts.

> Code scanning is available for organization-owned repositories in GitHub Enterprise Server. This feature requires a license for GitHub Advanced Security. For more information, see "About GitHub Advanced Security."

About code scanning alerts

Learn about the different types of code scanning alerts and the information that helps you understand the problem each alert highlights.

Managing code scanning alerts for your repository

From the security view, you can view, fix, or dismiss alerts for potential vulnerabilities or errors in your project's code.

Triaging code scanning alerts in pull requests

When code scanning identifies a problem in a pull request, you can review the highlighted code and resolve the alert.
