# Renaming custom fields

---

Learn about renaming existing custom fields in your project.

① Navigate to your project.

② In the top-right, click ··· to open the menu.

③ In the menu, click ⚙ **Settings** to access the project settings.

④ Click the name of the custom field you want to rename.

⑤ Under "Field name", type the new name for the field.

⑥ To save changes, press `Return` .
