Editing a project (classic)
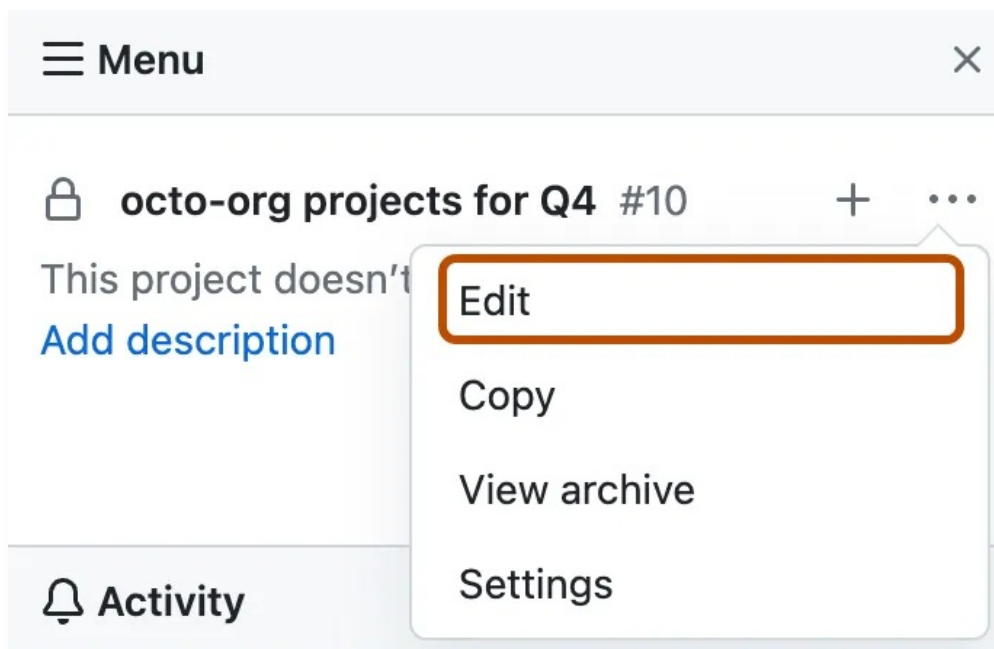

You can edit the title and description of an existing classic project.

> **Notes:**
> - Projects, the all-new projects experience, is now available. For more information about Projects, see "About Projects" and for information about migrating your classic project, see "Migrating from projects (classic)."
> - You can only create a new classic project board for an organization or user that already has at least one classic project board. You cannot create new classic projects for repositories. If you're unable to create a classic project board, create a project instead.

> **Tip:** For details on adding, removing, or editing columns in your classic project, see "Creating a project (classic)."

1. Navigate to the classic project you want to edit.

2. On the top-right side of the classic project, click ☰ **Menu**.

3. Click ···, then click **Edit**.

4. Modify the classic project name and description as needed, then click **Save project**.
