Enabling or disabling GitHub Discussions for your repository

Further reading

You can use GitHub Discussions in a repository as a place for your community to have conversations, ask questions, and post answers without scoping work in an issue.
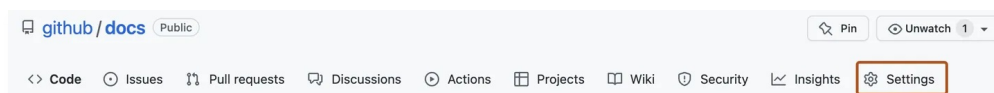

> **Who can use this feature**
> People with admin permissions to a repository can enable GitHub Discussions for the repository.

Enabling or disabling GitHub Discussions for your repository 🔗

You can enable or disable GitHub Discussions for a repository.

1. On GitHub.com, navigate to the main page of the repository.

2. Under your repository name, click ⚙ **Settings**.

3. Scroll down to the "Features" section and select **Discussions**.

4. To disable discussions, under "Features", unselect **Discussions**.

You can also use organization discussions to facilitate conversations that span multiple repositories in your organization. For more information, see "[Enabling or disabling GitHub Discussions for an organization](#)."
