This version of GitHub Enterprise was discontinued on 2023-03-15. No patch releases will be made, even for critical security issues. For better performance, improved security, and new features, upgrade to the latest version of GitHub Enterprise. For help with the upgrade, contact GitHub Enterprise support.

About the GitHub Enterprise API

GitHub Enterprise Server supports REST and GraphQL APIs.

With the APIs, you can automate many administrative tasks. Some examples include:

- Perform changes to the Management Console. For more information, see "GitHub Enterprise administration."
- Configure LDAP sync. For more information, see "GitHub Enterprise administration."
- Collect statistics about your enterprise. For more information, see "GitHub Enterprise administration."
- Manage your enterprise account. For more information, see "Managing enterprise accounts."

For the complete documentation for the GitHub Enterprise Server APIs, see GitHub REST API and GitHub GraphQL API.
