# Configuring webhooks for events in your sponsored account

**In this article**

You can configure webhooks to alert you when you receive new sponsorships or existing sponsors make changes to their sponsorships.

## About webhooks for events in your sponsored account 🔗

To monitor changes to your sponsorships, such as cancellations at the end of a pay period, you can create webhooks for your sponsored user or organization account. When you set up a webhook for your sponsored account, you'll receive updates when sponsorships are created, edited, or deleted. For more information, see the `sponsorship webhook event`.

## Adding a webhook 🔗

You can add a webhook for your sponsorship. For more information, see "Creating webhooks."

## Editing a webhook 🔗

You can edit a webhook to change any of the settings that were selected when the sponsorship webhook was initially created. For more information, see "Editing webhooks."

## Disabling a webhook 🔗

You can disable or delete a webhook for your sponsorship. For more information, see "Disabling webhooks."

## Viewing recent deliveries and responses 🔗

You can view details about webhook deliveries that occurred in the past 3 days. For more information, see "Viewing webhook deliveries."
