Managing discussion creation for repositories in your organization

In this article

Allowing or disallowing users with read access to create discussions

Further reading

You can choose the permission levels that members require to create discussions in repositories owned by your organization.
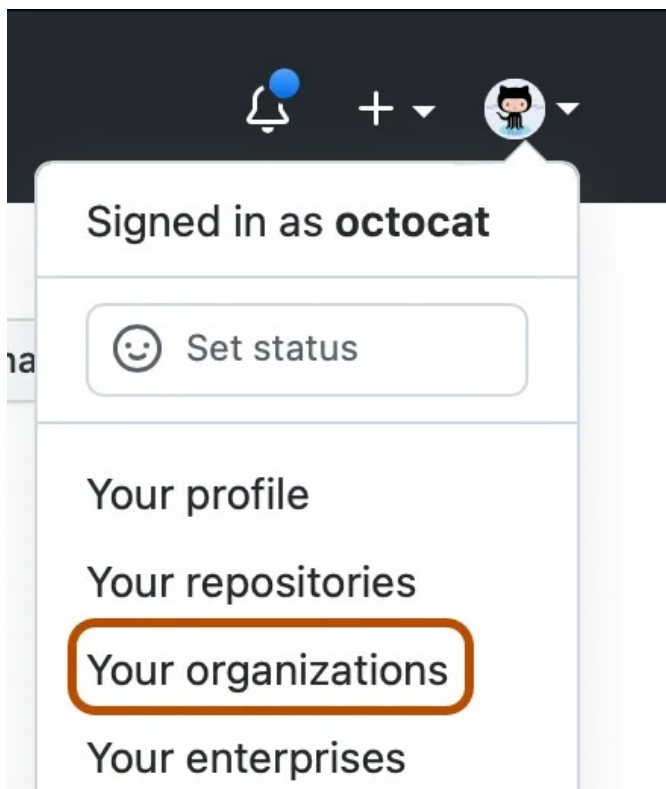

Who can use this feature
Organization owners can manage discussion creation for repositories owned by the organization.

Allowing or disallowing users with read access to create discussions 🔗

By default, organization members with read access can create discussions if a repository administrator or organization owner enables discussions for a repository owned by the organization.

1 In the top right corner of GitHub.com, click your profile photo, then click 🏢 **Your organizations**.

2 Next to the organization, click **Settings**.

3. In the "Access" section of the sidebar, click ⋆⋆ **Member privileges**.

4. In the "Admin repository permissions" section, under "Repository discussions", select or deselect **Allow users with read access to create discussions**.

5. Click **Save**.
