This version of GitHub Enterprise was discontinued on 2023-03-15. No patch releases will be made, even for critical security issues. For better performance, improved security, and new features, upgrade to the latest version of GitHub Enterprise. For help with the upgrade, contact GitHub Enterprise support.

# Code security documentation

Build security into your GitHub workflow with features to keep secrets and vulnerabilities out of your codebase, and to maintain your software supply chain.

Overview

Start here     View all →

## Securing your repository

You can use a number of GitHub features to help keep your repository secure.

## Securing your organization

You can use a number of GitHub features to help keep your organization secure.

## Configuring code scanning for a repository

You can configure code scanning for a repository to find security vulnerabilities in your code.

### Getting started with code security

GitHub security features

Securing your repository

Securing your organization

Adding a security policy to your repository

Auditing security alerts

## Adopting GitHub Advanced Security at scale

Introduction to adopting GitHub Advanced Security at scale

Phase 1: Align on your rollout strategy and goals

Phase 2: Preparing to enable at scale

Phase 3: Pilot programs

Phase 4: Create internal documentation

Phase 5: Rollout and scale code scanning

Phase 6: Rollout and scale secret scanning

## Keeping secrets secure with secret scanning

About secret scanning

Configuring secret scanning for your repositories

Defining custom patterns for secret scanning

Managing alerts from secret scanning

Secret scanning patterns

Troubleshooting secret scanning

## Finding security vulnerabilities and errors in your code with code scanning

Automatically scanning your code for vulnerabilities and errors� • 12 articles

Integrating with code scanning� • 3 articles

Using CodeQL code scanning with your existing CI system� • 4 articles

## Use the CodeQL CLI to secure your code

Using the CodeQL CLI� • 9 articles

CodeQL CLI reference� • 3 articles

CodeQL CLI commands manual� • 72 articles

## Working with security advisories

Working with global security advisories from the GitHub Advisory Database� • 4 articles

## Securing your software supply chain

Understanding your software supply chain� • 7 articles

End-to-end supply chain� • 4 articles

## Keeping your supply chain secure with Dependabot

Identifying vulnerabilities in your project's dependencies with Dependabot alerts� • 4 articles

Automatically updating dependencies with known vulnerabilities with Dependabot security updates� • 2 articles

Keeping your dependencies updated automatically with Dependabot version updates� • 5 articles

Working with Dependabot� • 6 articles
