# Installing an OAuth app in your personal account

**In this article**

You can install OAuth apps from GitHub Marketplace to use in your personal account.

## About installing OAuth apps in your personal account 🔗

> **Note:** This article applies to installing and purchasing apps from GitHub Marketplace only. For more information on apps purchased from integrators, see "About using integrations."

If you choose a paid plan, you'll pay for your app subscription on your personal account's current billing date using your existing payment method.
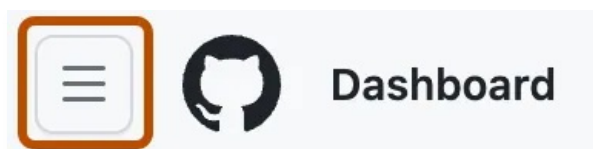

If you choose a paid plan with a free trial, you can cancel at any time during your trial period without being charged, but you will automatically lose access to the app. Your paid subscription will start at the end of the 14-day trial. For more information, see "About billing for GitHub Marketplace."

For more information about installing a GitHub App, see "Installing a GitHub App from GitHub Marketplace for your personal account."

## Installing an OAuth app in your personal account 🔗

If you belong to any organizations that enforce SAML single sign-on, you may be prompted to authenticate through your identity provider before you can authorize an OAuth app. For more information about SAML, see "About authentication with SAML single sign-on."

① To open GitHub Marketplace, in the top-left corner of GitHub.com, select ☰, then click 🎁 **Marketplace**.

> **Note**: This step refers to the new global navigation, which is currently in public beta and subject to change. For more information on the new global navigation and reverting to the

old global navigation, see the [GitHub Changelog](#).

2. Browse to the app you'd like to install, then click on the app's name.

3. On the app's page, under "Pricing and setup," click the pricing plan you'd like to use.

4. Click **Install it for free**, **Buy with GitHub**, or **Try free for 14 days**.

5. Under "Review your order," in the **Account** dropdown menu, confirm that you're installing the app for your personal account.

6. If you chose a paid plan, in the "Payment Method" section, review your payment method.

   - To change the existing payment method on file for your personal account, click **Edit**, then complete the form to add a new payment method.
   - If there isn't a payment method on file for your personal account, complete the form to add a credit card or PayPal account.

7. Click **Complete order and begin installation**.

8. Review the information about the app's access to your personal account and data, then click **Authorize application**.
