Creating an issue

Issues can be created in a variety of ways, so you can choose the most convenient method for your workflow.

Quickstart for Projects

Experience the speed, flexibility, and customization of Projects by creating a project in this interactive guide.

Quickstart for tasklists

Follow this guide to learn how to create and modify tasklists in the UI and with Markdown.

Best practices for Projects

Learn tips for managing your projects.

Popular

About issues
Use GitHub Issues to track ideas, feedback, tasks, or bugs for work on GitHub.

About Projects
Projects is an adaptable, flexible tool for planning and tracking work on GitHub.

Creating a project
Learn how to create an organization or user project.

Creating a tasklist
You can create a tasklist using the GitHub Enterprise Cloud UI or Markdown.

Guides 🔗

Changing the layout of a view
You can view your project as a high-density table, as a kanban board, or as a timeline-style roadmap.

@GitHub

Linking a pull request to an issue
You can link a pull request or branch to an issue to show that a fix is in progress and to automatically close the issue when the pull request or branch is merged.

@GitHub

Automating Projects using Actions
You can use GitHub Actions to automate your projects.
