---

## You can add or remove GitHub Advanced Security licenses for your enterprise.

> **Who can use this feature**
> Enterprise owners can manage licensing for GitHub Advanced Security.

> GitHub Advanced Security is available for enterprise accounts on GitHub Enterprise Cloud. Some features of GitHub Advanced Security are also available for public repositories on GitHub.com. For more information, see "GitHub's plans."
>
> For information about GitHub Advanced Security for Azure DevOps, see Configure GitHub Advanced Security for Azure DevOps in Microsoft Learn.

## About licensing for GitHub Advanced Security 🔗

Each license for GitHub Advanced Security specifies a maximum number of accounts that can use these features. Each active committer to at least one repository with the feature enabled uses one license. A committer is considered active if one of their commits has been pushed to the repository within the last 90 days, regardless of when it was originally authored. For more information about committer numbers, see "About billing for GitHub Advanced Security." For information about purchasing a license, see "Signing up for GitHub Advanced Security."

## Managing the number of GitHub Advanced Security committers 🔗

① In the top-right corner of GitHub.com, click your profile photo, then click **Your enterprises**.

② In the list of enterprises, click the enterprise you want to view.

③ In the enterprise account sidebar, click ⚙ **Settings**.

④ Under ⚙ **Settings**, click **Enterprise licensing**.

⑤ Under "GitHub Advanced Security GitHub Advanced Security", click **Committers**.

6 Under "Committers", click **Manage committers**.

7 Under "Total committers", click the plus or minus buttons to add or remove committers.

8 Click **Update committers**.

## Canceling your GitHub Advanced Security subscription 🔗
