Upload fails because GitHub Advanced Security is disabled

You can only upload SARIF results to repositories where GitHub Advanced Security is enabled.

About this error

```
GitHub Advanced Security not enabled
GitHub Advanced Security blocked by a policy
403: GitHub Advanced Security is not enabled
```

This error is reported if a process attempts to upload a SARIF file to a repository where GitHub Advanced Security is not enabled or where use of this feature is blocked by a policy.

You will only see this error for SARIF files that contain results created using CodeQL.

For information on how to confirm this error and fix the problem, see "Error: "Advanced Security must be enabled for this repository to use code scanning"."
