# Viewing and managing your active SAML sessions

You can view and revoke your active SAML sessions in your settings.

You can view a list of devices that have logged into your account, and revoke any SAML sessions that you don't recognize.

1 In the upper-right corner of any page, click your profile photo, then click **Settings**.

2 In the "Access" section of the sidebar, click ((•)) **Sessions**.

3 Under "Web sessions," you can see your active SAML sessions.

4 To see the session details, next to the session, click **See more**.

5 To revoke a session, in the session details, click **Revoke SAML**.

> **Note:** When you revoke a session, you remove your SAML authentication to that organization. To access the organization again, you will need to single sign-on through your identity provider. For more information, see "About authentication with SAML single sign-on."
