Integrating Jira with your personal projects

You can integrate Jira Cloud with your personal account to scan commits and pull requests, creating relevant metadata and hyperlinks in any mentioned Jira issues.

1. In the upper-right corner of any page, click your profile photo, then click **Settings**.
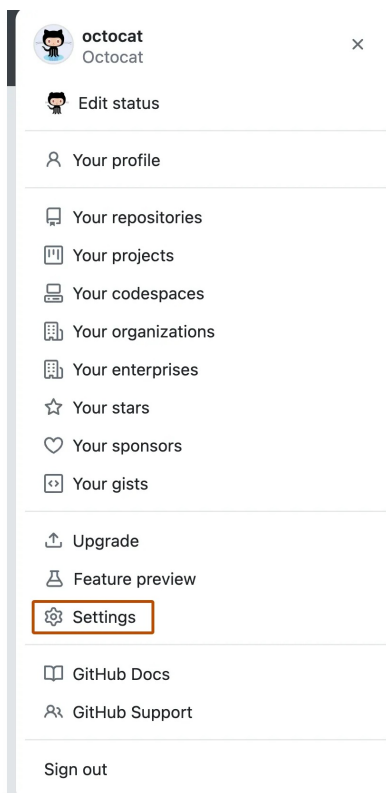

2. In the left sidebar, click **Developer settings**.

3. In the left sidebar, click **OAuth apps**.

4. Click **Register a new application**.

5. Under **Application name**, type "Jira".

6. Under **Homepage URL**, type the full URL to your Jira instance.

7. Under **Authorization callback URL**, type the full URL to your Jira instance.

8. Click **Register application**.

9. Under **Developer applications**, note the "Client ID" and "Client Secret" values.

10. Link your GitHub account with Jira. For more information, see [Atlassian's help documentation](#).
